Forecast for Friday 17 Nov 2023

Weather: A few scattered showers first, which will be wintry above 800m, with weather turning dry and bright through the early morning. From mid-afternoon onwards, medium and high cloud will move in from the southwest then rain arriving late evening, falling as snow above 800m. Light to moderate winds first but increasing from the southwest through the evening and night with a risk for gales at that time. Feeling cold near the tops especially.

Chance of cloud-free hill tops above 800m: 30% first soon becoming 90-100%, then cloud increasing from the southwest through the evening and night.

Low Cloud and visibility: Low cloud at first (above 600m) during the early morning will clear to leave generally clear skies and good visibilities through the morning and beginning of afternoon. Low cloud starting to cover tops towards the end of the day, when visibilities will also start to drop in precipitation.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Met Office Aberdeen Meteorologist's View

Generally good walking conditions but snow is expected above 900m. Conditions will deteriorate quickly through the evening and night, associated with increasing winds.

Forecast for Saturday 18 Nov 2023

Weather: Band of rain, which will be sleet above 900m, will be over the area since by early morning but will clear northeast by mid-morning. Showery outbreaks will follow which will be organized, heavy and possibly thundery at times. Strong southeast winds, reaching gales above 500-600m with winds veering southwest, as rain moves away, but remaining strong and can increase to gale near showery outbreaks.

Maximum wind: South or Southeast 45mph gusts 60mph decreasing 30mph gusts 50mph.

Chance of cloud-free hill tops above 800m: 0% until mid-morning, increasing to 60-70% after.

Low Cloud and visibility: Low cloud will cover much of the area at first above 600m with poor visibilities, associated with the above mentioned band of rain. This will clear from midmorning, leaving partly cloudy skies and good visibilities, which will drop at times with passing showers.

Temperature: **Glens:** Plus 8 increasing to 11 Celsius.
At 800m: Plus 5 decreasing to 3 Celsius.
Freezing level: 900m overnight, rising above summits by morning.
